
Don’t Quit

“When things go wrong, as they sometimes will, When the road you’re trudging seems all uphill, When the funds are low and the debts are high, And you want to smile, but you have to sigh, When care is pressing you down a bit, Rest, if you must, but don’t you quit.

Life is queer with its twists and turns, As every one of us sometimes learns, And many a failure turns about, When he might have won had he stuck it out; Don’t give up though the pace seems slow- You may succeed with another blow.

Often the goal is nearer than, It seems to a faint and faltering man, Often the struggler has given up, When he learned too late when the night slipped down, How close he was to the golden crown.

Success is failure turned inside out- The silver tint of the clouds of doubt, And you never can tell how close you are, It may be near when it seems so far, So stick to the fight when you’re hardest hit- It’s when things seem worst that you must not quit.”

John Greenleaf Whittier

Shloka from Niti Shatakam

प्रहस्य मणिमुद्रेरन्मकरक्रृद्यस्तर्तात् समुद्रभिरोपितापमाणुमाकलुकम्। भुजंगगमपि कौपिनि शिरसि पुष्पवद्धारे न्तं तु प्रतिनिविष्टमूर्खजनं चित्रमात्राध्ययते ॥

With courage, we could extract the pearl stuck in between crooked teeth of a crocodile. We could sail across an ocean that is tormented by huge waves. We may even be able to wear an angry snake on our head as if it were a flower. However it is impossible to satisfy an obstinate fool.

Case Study - Submucosal CA

Dr. V. Ganapathy and Muthushanthisree, Varma Research and Resource Center, Vivekananda Kendra - Nardep, Kanyakumari

A 60 yr old male from Anjanaeyapuram, who is reported to the varmam OPD of Siddha in Vivekanandha Kendra - Nardep on 23.12.2023.

Present complaints: Pain and swelling in left inner cheek, numbness, difficulty to open the mouth, swallowing difficulties and weight loss. He also had a small lump in neck since 1 year. He was mentally stressed due to intermittent pain.

Past History: There is no history of Tobacco and Betel nut use.

Co-morbid conditions: He is a Hypertensive

Medical history: He was previously treated with NSAIDs for 6 months with frequent intervals. Regularly taking Anti Hypertensive Medicines

Personal history: Lean body, Mixed diet habit and Non-alcoholic.

Observation/ palpation: Intra-oral examination revealed a painful normal-colored nodular lesion with smooth surface in the left buccal mucosa with small yellow papules at the surface with approximate size of 2.5 x 1.5 cm and firm in consistency. Nodular lesion seems to be cancerous although patient is not aware.

Diagnostic focus: By considering the characteristics of the lesion and our physical examination findings, our differential diagnosis were minor salivary gland tumors and other tumors of mesenchymal origin.

Therapeutic focus: Internally Arokya capsules 2 B.D, R6M Capsules 2 B.D, Parangipattai, Palagarai and Sangu Parpam in combination 2-3 gm B.D with milk, Chandamarutham Milagalaru B.D with Honey and External application of Neer kovai pills with hot water.

Before treatment: A single sub-mucosal and well-circumscribed nodular lesion was observed in the posterior region of the left buccal mucosa. The lesion was covered with clinically normal mucosa, measuring approximately 2.5 cm x 1.5 cm.

After Treatment: The size of the nodule is reduced and the lesion is now 1.5 cm x 1 cm and pain also much reduced. Now there is no swallowing difficulties and he has gained 3 kg weight.

Conclusion: Buccal mucosa cancer is a rare cancer that develops in the inner cheek of mouth. The present Siddha treatment protocol ensures the regain of the normalcy of oral mucosa. It is effective in the management of the disease without any adverse effect as well as having sustained relief in follow-up. It can be considered as a better alternative to the modern treatment in the management of Sub mucosal CA.

Swami Vivekananda Jayanti was celebrated at South Therivilai, Panchalingapuram, Agasteeswaram, and Thazhakudi of Kanyakumari District. Totally 164 members attended these four functions. Shri.C.Vijayaraghavan was the main resource person.
Our traditional wisdom stressed a holistic system, where the independence of all animate and inanimate objects made them on whole and entire being. Union was considered superior to division, the undifferentiated to the differentiated. Vidya, true knowledge, gave the ability to see the whole, as one integrated, inclusive universe. Avidya, ignorance, denied that ability. Avidya has now become the cornerstone of the global “knowledge” system.

Thinking outside the box can be best understood from the example of the seagull in the book, “Jonathan Livingston Seagull” by Richard Bach. In this allegory about a unique bird, the author writes, “for most gulls it is not flying that matters, but eating. For this gull though, it was not eating the mattered, but fight. “This is a fable about the importance of seeking a higher purpose in life. It is not only about out of the box thinking, but also about inside the box thinking.

1. Divorce, crime, and emotional stress cause money and products to change hands and add richly to the GDP. The cost of emotional prop-up drug, Prozac, alone added 1.2 billion dollars to American GDP.
2. The cost of family breakdown 40.6 billion dollars per year.
3. Undoing the effect of overeating 33 billion dollars per year.
4. 70% of American’s medical bills stem from preventable lifestyle related illnesses.
